## **Compressor Products International Acquires Horizon Compressor Services**

Stafford, Texas – October 15, 2008: Compressor Products International (CPI) is pleased to announce the acquisition of Horizon Compressor Services, a business located in Houston, TX, which manufactures valves and reconditions compressor valves and components.

With this acquisition, Horizon Compressor Services' products, which mainly serve the high-speed market, will be integrated in with CPI's organization. Gary Whitted, owner of Horizon Compressor Services, will remain with the organization.

"The acquisition of this local organization reflects our commitment to growth and development and allows CPI to expand our customer base and the products we offer," said Jack Devine, Vice President and General Manager for CPI.

### **About Compressor Products International**

Compressor Products International, an EnPro Industries company, is an industry leading manufacturer of precision engineered sealing components for reciprocating compressors. In addition to supplying packing, piston and rider ring product lines, CPI offers a complete line of compressor valves designed to provide each customer with maximum performance and reliability for their application. CPI headquarters is located in Stafford, Texas, with additional manufacturing, service and stocking facilities located throughout the world. For more information please visit <http://www.c-p-i.com>.
